

KENNON

Engineering & Precision Sewing Protection for Aircraft

At our core, Kennon is a precision sewing company. It's a niche we founded nearly forty years ago. Led by our team of professional engineers and military partners, we manufacture state-of-the-art covers for all military and civilian aircraft.

Kennon's engineering team consists of material scientists, chemical, industrial, and mechanical engineers. Many of our projects combine these

specialties to innovate custom designs that meet our customers' specifications. Our commitment is to do whatever it takes to protect our customer's high-value assets and satisfy them at every turn. Kennon is ISO 9001-2015 certified. We are proudly an employee-owned company located in Sheridan, Wyoming.

F-16 Falcon

Kennon manufactures a full line of plugs and covers for virtually all USAF aircraft including the A-10, C-130, F-15, F-16, F-35, and a full cover for the MQ-9.

Kennon's F-16 Items

We're the proud suppliers of plugs and covers for the USAF Thunderbirds.

We build all of our plugs and covers using state-of-the-art materials, and our ISO 9001-2015 certification assures you that the quality and craft are second to none.

The materials we choose are highly durable, weather resistant outdoor fabrics that last for years in harsh flight line environments and constant UV exposure.

Items are available in various colors, with graphics at no additional charge.

Plugs and covers can be purchased directly from us using a credit card or through contracting for larger purchases and are also available on our GSA schedule.
