

INFLATABLE INTAKE AND EXHAUST PLUGS

Our Solutions are Better

KENNON PORTABLE AIRCRAFT COVERS (PMAC) TRAVEL ON BOARD

Transporting the traditional foam plugs needed to protect the F-35 is a logistical challenge. They're bulky, heavy, and awkward. Kennon engineers took on solving this challenge and are proud to announce the solution.

Kennon is in the business of creating innovative protection for aircraft. Our new inflatable plugs protect the F-35 intake and exhaust from foreign object debris (FOD), tightly sealing the engine from risk. The plugs are dimensionally stable, made of thermoplastic polyurethane, utilizing an inflatable bladder that won't expand or contract with temperature changes. The plugs inflate fast and are just as durable

as our famous foam plugs. These inflatable plugs are much lighter. They fold up and can travel on board the aircraft. The plugs may be inflated using a standard Shrader air chuck or our optional hand pump.

We know how vital unit pride is and having your aircraft look sharp. We can print your logo in HD, up to 15" in diameter.

Kennon has a complete line of Portable Aircraft Covers (PMAC) that travel with the F-35. Be sure to ask about our other PMAC products.

WEIGHS LESS • INFLATES FAST • DURABLE • HD LOGOS

VALVE ACCESS

Hook and loop fastener cover protects the valve, and provides instructions for proper inflation and deflation.

DIMENSIONALLY STABLE

The plug's unique design creates a rigid, shape that won't change as the temperature changes.

INFLATION OPTIONS

The Schrader air chuck adapter & hand pump feature an integrated pressure relief valve to prevent over inflation.
