

OUR SOLUTIONS ARE BETTER

# Kennon PMAC

**Kennon PMAC** began as a SBIR contract to invent magnetic covers for the F-22. The program has evolved to become a suite of fifth-generation covers that utilize new technologies and advanced textiles for a variety of aircraft platforms.

The common thread between the entire product line is that PMAC covers stow on board the aircraft. They're with the aircraft at every stop, providing superior protection whenever and wherever there's a risk of foreign object debris (FOD).

We know how vital unit pride is and having your aircraft look sharp. Kennon will print your logo in HD on all our PMAC products for free. Our covers are available in standard red, desert sand, green, black, and various other colors.
