

OUR SOLUTIONS ARE BETTER

F-35 Lightning II

Right from the launch of the F-35, Kennon has offered a whole catalog of covers and plugs for the platform. First, we have our traditional sun shields, seat covers, and plugs for the intake and exhaust. We followed that up by developing PMAC covers that utilize new technologies and advanced textiles to provide fifth-generation protection for your fifth-generation aircraft. We also offer inflatable plugs, providing yet another level of protection and portability.

Kennon is ISO 9001-2015 certified, ensuring quality that won't let your team down. Our covers are available in standard desert sand, as well as green, black, and a variety of other colors. We can include your unit's full-color graphics, printed in high-definition, on any military item for no charge.

Purchase direct from us using your unit's credit card, or alternatively, you can contract with us for larger purchases. Kennon premium covers are also available through our GSA schedule.
